

BRIEF ALIGNED EXECUTIVE REPORT

Strategic Environment Mapping

Executive readout for Chris' first submission.

PRIMARY ANSWER

The strategic environment around Yousician is broader than direct competitors: music learning, hobby discovery, AI, songs, hardware, creators, education, rights, investors, media, awards and funding all shape the market.

This report follows the new direction: simpler platform, agreed journey categories, small key player set, triage first, deeper research only where priority is confirmed.

REPORT STATUS

Short executive report

Submission ready first read with explicit completion fields for credentialed Appfigures and internal relationship inputs.

BOARD READING ORDER

Answers first, priority actors second, proof and caveats after that.

CLAIMS CONTROLLED

Appfigures and relationship claims stay in completion layers until review approval exists.

DECISION USE CLEAR

The export is structured for prioritization, not exhaustive market cataloguing.

113 tracked records

4 key players

13 news grade moves

8 journey categories

3 guiding questions answered

1

Direct answers to the guiding questions

Short export for fast executive reading.

EXECUTIVE ANSWER

Who influences the future of music learning? Who is successful?

Use a four actor priority set before expanding coverage.

Start with Simply, Ultimate Guitar, Duolingo and Fender. Use Kahoot and the rest of the long tail as context until board and LST feedback confirms the next entities to deepen.

This keeps executive discussion on the few actors most likely to affect onboarding, practice habit formation, distribution and trust.

EXECUTIVE ANSWER

Who influences music as a hobby?

The hobby system is journey led, not competitor led.

The journey runs from discovery to identity: discovery platforms, instruments, learning apps, practice surfaces, creation tools, sharing loops and broader entertainment platforms all shape motivation.

The market view should explain how motivation travels across the journey instead of collapsing everything into direct learning apps.

EXECUTIVE ANSWER

Who shapes the strategic environment?

The next step is triage and proof, not more inventory.

Agree categories, rank importance, validate with board and LST, then deepen only the highest priority profiles.

This prevents low signal additions from crowding the decision story and preserves the review gate for unapproved claims.

2

Priority actors

The strongest signal actors are shown before supporting detail.

01

Simply

Learning apps / Yousician + GuitarTuna

Direct learning competitor

Credentialed data pending

Useful benchmark for onboarding, motivation, pricing, and growth in app based music education.

02

Ultimate Guitar

Practice habits / GuitarTuna

Song and practice habit owner

Credentialed data pending

Strong influence on how hobbyists discover songs and move from inspiration to practice.

03

Duolingo

Education benchmarks / Yousician

Learning mechanics benchmark

Source-backed profile

Not music specific, but highly relevant for learning loops, retention, brand, and AI in education.

04

Fender

Gear channels / GuitarTuna

Hardware ecosystem owner

Relationship field open

Instrument brands can shape the beginner funnel before users choose a learning app.

These actors are shown first because they best answer the brief's core questions: learning influence, hobby influence, success surfaces, and strategic environment pressure.

3

Completion notes

The short version keeps only the caveats that must not be missed.

Appfigures

CREDENTIALIAED INPUT

App-performance fields are prepared for Appfigures import; the report avoids invented revenue, download, ranking or country estimates.

EXTERNAL CREDENTIALIAED EXPORT

IMPORT VERIFIED APP METRICS BEFORE PROMOTING ANY PERFORMANCE WINNER CLAIM.

Yousician links

INTERNAL INPUT

Relationship owner/status fields are prepared in the workbook and intentionally left open for Yousician completion.

YOUSICIAN INTERNAL REVIEW

APPROVE OR REJECT RELATIONSHIP CLAIMS IN THE REVIEW QUEUE BEFORE THEY APPEAR AS FINAL CLAIMS.

Sources

TRACEABLE

Market observations retain source context; deeper source audit remains appendix only.

SOURCE QA

KEEP UNRESOLVED AUTH OR REPAIR CASES IN APPENDIX STATUS UNTIL A VERIFIED REPLACEMENT IS LOGGED.

What is covered

The requested ecosystem map, key players, database, relationship fields, guiding answers, market moves, awards and funding.

What is deliberately not claimed

Deep product UX reviews, invented Appfigures estimates, inferred relationships, or app performance winners.

4

Package contents

The deck, report, database and completion templates form the current package.

Executive deck

PRIMARY SLIDE DECK

Deck PDF reading copy

NON-EDITING READ COPY

Market landscape report

NARRATIVE MARKET REPORT

Strategic environment database

RECIPIENT-FACING WORKBOOK

Submission package ZIP

ALL CURRENT FILES IN ONE PACKAGE

What it is

Executive ecosystem mapping with direct answers, market proof, and clearly qualified data caveats.

Performance caveat

App-based performance ranking is not finalized until credentialed Appfigures metrics are imported.

Appendix availability

Dashboard and source-audit appendix files are available on request, but are not part of the first read package.
