

BRIEF-ALIGNED EXECUTIVE EXPORT

Strategic Environment Mapping: exact brief handoff

Executive export / 11 Jun 2026

PRIMARY ANSWER

The strategic environment around Yousician is broader than direct competitors: music learning, hobby discovery, AI, songs, hardware, creators, education, rights, investors, media, awards and funding all shape the market.

96 tracked records

28 key players

48 board moves

0 credentialed Appfigures rows

This export is intentionally limited to the requested handoff structure: executive slides, final report, database, relationships layer, Appfigures status, market moves, sources and validation gates. Optional dashboard exploration is not part of this export.

REPORT LENGTH

Standard brief-aligned report / Brief coverage, slide coverage, ecosystem map, and validation gates.

Report length: Standard brief-aligned report. Brief coverage, slide coverage, ecosystem map, and validation gates.

1

Open these files first

The slides are the primary executive artifact; the report and workbook are proof layers.

AUDIT TRAIL

Readiness gate

BOARD-USE STATUS

Appfigures runbook

IMPORT PATH

Claim matrix

SOURCE QA

Internal research context

LOADED USER RESEARCH ANCHORS

Use this wording

Executive-ready ecosystem mapping package with explicit Appfigures, relationship and hard-claim gates.

Do not call it

Fully live, fully self-updating, or Appfigures-populated. The backend is review-gated and credential-dependent.

2

Brief requirement coverage

Only the requested brief requirements are listed here.

Broad ecosystem map

COVERED

Shows influence layers around the learner, not only direct competitors.

Key players

COVERED

28 key players are profiled; top 10 are prioritized in the deck.

Database

COVERED

96 tracked records with category, role, evidence and next-action fields.

Relationships space

PREPARED

28 rows remain internal-completion fields for Yousician.

Guiding questions

COVERED

Answered directly in the executive deck and report synthesis.

Appfigures where possible

BLOCKED

16 request rows are ready; 0 credentialed rows are populated.

Last 24 months

COVERED

48 board-grade market moves are curated from the expanded timeline.

Weak categories

COVERED

Teachers, creators, investors, media/culture, awards and funding are visible in the proof pack.

Sources and confidence

COVERED

185 claim-source rows; source confidence stays explicit.

3

Slide coverage against the brief

The executive deck is structured as the direct brief answer, not as a dashboard extract.

1

Executive cover

Frames the work as ecosystem mapping, not competitor analysis.

2

Brief answers

Answers the three guiding questions before any detail.

3

Ecosystem orbit

Shows influence layers around Yousician and the learner.

4

Influence ladder

Ranks the 10 actors/clusters that matter most.

5

Success definition

Separates success surfaces from missing Appfigures performance proof.

6

Appfigures gate

Makes the missing performance data explicit.

7

Market moves

Summarizes the 24-month news-grade signal.

8

AI layer

Separates creation disruption, practice utility and rights governance.

9

Music as hobby

Answers who shapes hobby discovery, playing, creation and sharing.

10

Trust layer

Covers teachers, creators and education bodies.

11

Relationships

Positions relationship data as an internal completion layer.

12

Evidence QA

Shows hard-claim, source-confidence and data-quality controls.

13

Living system

Explains refresh, review, import and rebuild workflow.

14

Send package

States how to use slides, report and database.

Ecosystem map and category coverage

Visual map plus the requested brief categories.

Learning apps

15 records / 9 key players
Simply, Pickup Music, Rocksmith+

Practice habits

11 records / 5 key players
YouTube, Chord ai, Ultimate Guitar

Gear channels

11 records / 4 key players
Positive Grid, Fender, Yamaha

Creation tools

15 records / 3 key players
BandLab, Splice, FL Studio

AI music tech

9 records / 4 key players
Suno, Moises, Udio

Education benchmarks

13 records / 1 key players
Duolingo, ABRSM, Kahoot

Market signals

22 records / 2 key players
Spotify for Artists, TikTok for Artists, MIDiA Research

5

Validation gates before Board use

These are the remaining gaps that should be called out before Board use.

Appfigures

BLOCKED UNTIL CREDENTIALLED EXPORT

No revenue/download/rank/country-mix conclusion is board-safe yet.

Relationships

BLOCKED UNTIL YOUSICIAN INPUT

No external research should infer owner, contact history or relationship status.

Hard claims

REVIEW-GATED

Ownership, funding, users, AI features and M&A need claim-source support.

Creator reach

PARTIALLY COMPLETE

YouTube proxies exist; TikTok, Instagram and average views still need platform validation.

16 source-review items

78 refresh retry rows

28 relationship rows pending

0 links checked

400 refresh checks logged

What is in scope

The requested ecosystem map, key players, database, relationships layer, guiding answers, Appfigures status, market moves, awards/funding and source QA.

What is not in scope here

Deep product UX reviews, invented Appfigures estimates, inferred relationships, or a generic dashboard walkthrough.
