

Yousician Strategic Environment Mapping

A brief-led ecosystem report: who influences music learning, who appears successful, who shapes music as a hobby, and which actors define Yousician's strategic environment.

96

ecosystem records

The map covers companies, creators, institutions, capital, media and market signals.

28

key players

All priority actors/clusters are summarized with role, reach, ownership and relevance.

49

market moves

Last-24-month news-grade moves answer who made the news for what.

12

brief categories

Every requested category is visible as part of the ecosystem, not hidden in appendix.

7

success surfaces

Success is read across app, repertoire, AI utility, trust, community and hardware funnels.

6

internal context rows

Static Yousician user and market context is included as grounding, not live metric data.

10

top actors

The executive read starts from the actors most likely to shape the market around Yousician.

Executive Summary

The environment around Yousician is not only a direct-competitor market. It is shaped by learning apps, hardware brands, song and practice platforms, teachers and education bodies, creator educators, hobby software, AI tools, rights owners, investors, media and cultural demand drivers.

The readout is structured around the requested ecosystem map, key players, brief-style one-pagers, database, relationship fields and guiding-question answers. It is intended to make the stakeholder landscape legible before moving into source detail.

Latest source-skim update: Suno announced more than \$400M in Series D funding at a \$5.4B post-money valuation on June 3, 2026. This strengthens the conclusion that AI music creation is a market-structure force, not only a product feature.

Input note: Appfigures performance metrics and internal relationship fields are prepared as separate support files because they require credentialed or Yousician-internal inputs.

What the brief asks, answered first

1. Who influences the future of music learning? Who is successful?

Direct learning apps, song/practice systems, AI practice utilities, teacher/creator educators, education benchmarks and hardware-backed funnels shape learning. Success is clearest by type: Simply for direct-app benchmarking, Ultimate Guitar for repertoire, Moises for AI practice utility, Suno for AI creation, BandLab/Splice for hobby creation, ABRSM/Trinity/School of Rock for trust, and Fender/Gibson/Yamaha for hardware funnels.

2. Who influences the future of music as a hobby?

TikTok, YouTube, Spotify, artists, song libraries, creator tools, AI generation tools, instrument brands, retailers and cultural moments influence what people want to play, make and share before they enter formal learning.

3. Who influences the future strategic environment around Yousician?

AI companies, rights owners, app-based competitors, hardware brands, creators, publishers, investors, awards/funding bodies, media and education benchmarks jointly shape the field around Yousician.

Static internal research grounding for how to read the ecosystem

Static Yousician user/market context by User Insights, last reviewed 2026-06-04; based on internal meta-analyses for Yousician users, GuitarTuna users and market research. Live Confluence research database was not queried in this packaging pass.

Context Area	Internal Signal	Strategic Implication
Yousician users	Yousician users are usually early in their guitar journey and want a guided, personalised path, timely feedback and eventually their favourite songs.	Direct learning benchmarks should be read through beginner guidance, feedback, motivation and song relevance, not only feature breadth.
GuitarTuna users	GuitarTuna users are more self-guided. They want independence, songs, chords, tools and optional feedback rather than a fixed path.	The ecosystem map needs song, chord, tab, utility and self-guided practice surfaces alongside formal learning apps.
Song-led jobs	Across skill levels, important guitar jobs cluster around learning chords, transitions, song sections, strumming patterns and playing songs from memory.	Ultimate Guitar, Songsterr, MuseScore, Chordify, YouTube and AI song-practice tools are core habit surfaces, not appendix-only comparables.
Starting and restarting	People start or restart because of love of music, feel-good free time, the guitar dream, access to a guitar, or emotional life moments.	Hardware brands, retailers, creators and emotional beginner UX are strategically relevant because they shape re-entry before app choice.
Market awareness	Internal market context says the category has low overall awareness, lacks strong brands and lacks a clear leader beyond YouTube as a default free source.	The opportunity is not only to beat app competitors; it is also to make the category easier, less intimidating and more clearly branded.
Known competitor read	Simply Guitar is strong on emotional UX and song-focused courses; Ultimate Guitar owns a large chord/tab library but can feel cluttered; YouTube is free but uncurated.	Success should be read as a mix of emotional onboarding, repertoire access, guidance quality and reduced user research burden.

WHO IS SUCCESSFUL?

Successful actors by success type

This answers the success question without pretending that missing Appfigures data can identify app revenue/download winners. Ecosystem influence can already be read by surface; app-performance ranking is the remaining credentialed input.

Success Type	Actors	Evidence	Caveat
Direct app benchmark	Simply / JoyTunes	Closest app-learning benchmark for onboarding, motivation, subscription learning and beginner conversion.	Appfigures still required for revenue/download ranking.
Repertoire / practice surface	Ultimate Guitar / Muse Group	Strong repertoire ownership and song-intent surface around tabs, chords and practice habits.	Use as ecosystem influence, not revenue ranking.
AI practice utility	Music.AI / Moises	Stems, isolation, transcription and practice utility connect AI directly to playing and creation workflows.	Mobile performance still requires credentialed validation.
AI creation signal	Suno	Funding, rights debate and product visibility make AI music creation a market-structure force.	Not a learning-app performance comparable.
Hobby creation / community	BandLab / Splice	Creator workflows and communities shape participation beyond formal learning.	Compare by creator ecosystem strength, not lesson UX.
Trust and curriculum layer	ABRSM / Trinity / School of Rock	Certification, teacher trust and education infrastructure shape parent/learner confidence.	Success is credibility and reach, not app-store metrics.
Hardware funnel	Fender / Gibson / Yamaha	Brands and retailers influence instrument access, bundles and beginner pathways.	Hardware distribution and learning-app performance should be read separately.

TOP ACTORS

The 10 actors or clusters that should lead the executive read

These actors are prioritized by ecosystem influence. They are not app-performance-ranked because that requires the Appfigures input.

Rank	Actor Or Cluster	Primary Influence Layer	Guiding Question Answered	Priority Reason
1	Suno	AI creation and rights risk	Music as a hobby; strategic environment	Suno is the clearest signal that music participation can move from learning an instrument to prompting, generating and sharing music, while also triggering rights and licensing risk.
2	Music.AI / Moises	AI practice utility and creator tooling	Music learning; music as a hobby	Moises connects AI directly to practice utility: stems, isolation, transcription and creator workflow reduce friction between song discovery and playing.
3	Simply / JoyTunes	Direct app-based learning benchmark	Music learning; who is successful	Simply is the closest mobile learning benchmark for onboarding, motivation, subscription learning and beginner conversion.
4	Ultimate Guitar / Muse Group	Song-practice habit and repertoire ownership	Music learning; music as a hobby	Ultimate Guitar controls a major song-to-practice surface: tabs, chords, community and repeated practice intent.
5	BandLab	Creation community and hobby expansion	Music as a hobby; strategic environment	BandLab represents the path where hobbyists create, collaborate and publish rather than only learn or practice.
6	TikTok / YouTube music discovery	Discovery, demand creation and creator trust	Music as a hobby; music learning	These platforms shape what beginners want to play and which creators they trust before a learning product is considered.
7	Fender / Gibson / Yamaha hardware ecosystems	Instrument access, bundles and branded learning funnels	Music learning; strategic environment	Hardware brands can turn instrument purchase, setup, app onboarding and lesson subscription into one beginner journey.
8	Splice	Paid creator tools and rights-aware workflow	Music as a hobby; strategic environment	Splice shows that hobby participation can become paid creator workflow, sample access and production learning.
9	ABRSM / Trinity / School of Rock education layer	Trust, curriculum, certification and teacher/parent influence	Music learning; strategic environment	Education bodies and school networks shape credibility, progression, parent trust and teacher recommendations.
10	Spotify / labels / rights infrastructure	Rights, artist data, repertoire and AI governance	Music as a hobby; strategic environment	Rights owners and music platforms set the permission, repertoire and artist-authenticity context for AI, songs and learning content.

What the ecosystem currently looks like

1 / VERY CLOSE

Direct learning and practice apps

Simply, Flowkey, Skoove, Fender Play, Gibson App, Rocksmith+, Guitar Tricks, Pickup Music

These players compete or benchmark directly on beginner learning, practice feedback, lessons, song-led curricula and subscription habits.

2 / CLOSE

Song and repertoire ownership

Ultimate Guitar, MuseScore, Songsterr, Chordify, Chord ai, YouTube

Song demand and repertoire access shape what learners actually practice and why they return.

3 / CLOSE / PARTNERSHIP SURFACE

Hardware-backed beginner funnels

Fender, Gibson, Yamaha, Positive Grid, Donner, retailers

Instrument purchase is a major entry point; brands can bundle apps, lessons, setup and accessories into the beginner journey.

4 / CLOSE / ADJACENT UTILITY

AI practice utility

Moises, Chord ai, Chordify AI features, transcription/stem tools

These tools reduce the distance from song discovery to usable practice assets such as stems, chords and transcriptions.

5 / ADJACENT HOBBY EXPANSION

Creation and production tools

BandLab, Splice, GarageBand, Ableton, FL Studio, Soundtrap

Learners increasingly move from playing to creating, remixing, producing and sharing.

6 / ADJACENT TRUST AND ACQUISITION LAYER

Creator educators and media demand

JustinGuitar, Marty Music, Drumeo, Pianote, Rick Beato, Paul Davids, Guitar World, MusicRadar, MusicTech

Creators and media shape trust, song demand, lesson expectations and the beginner's mental model of progress.

7 / TRUST / BENCHMARK LAYER

Formal education and teacher networks

ABRSM, Trinity, RSL Awards, MTNA, Berklee Online, School of Rock, teacher platforms

These bodies influence standards, credibility, parent trust, teacher recommendations and progression pathways.

8 / STRATEGIC ENVIRONMENT

AI creation, rights and platform governance

Suno, Udio, ElevenLabs Music, labels, RIAA, Spotify, YouTube, TikTok

AI generation and rights governance reshape what music participation, repertoire use and content authenticity mean.

Capital, awards and public funding

VC/growth funds, strategic investors, Business Finland, Horizon Europe, awards ecosystems

Funding and awards indicate where the market sees momentum and where non-dilutive or credibility opportunities may exist.

Brief-category coverage

Brief Category	Coverage	Key Examples	Output Location
Music learning apps and platforms	15 database records / 9 key players	Simply / Flowkey / Fender Play / Rocksmith+	Deck, report, database, Appfigures data request
Instrument brands, manufacturers and distributors	11 database records / 4 key players	Fender / Gibson / Yamaha / Positive Grid	Ecosystem map, key players, database
Teachers, schools and music education organizations	17 education rows plus key-player coverage	ABRSM / Trinity / School of Rock / Berklee Online	Trust infrastructure section, database
Music hobby software ecosystem	26 database records / 8 key players	Ultimate Guitar / MuseScore / Songsterr / BandLab	Ecosystem map, hobby journey, key players
Wider education and self-improvement ecosystem	Covered through wider education rows and benchmark platforms	Duolingo / Berklee Online / classroom music platforms	Education category coverage, database
Investors active in the space	22 investor rows	Menlo Ventures / Lightspeed Venture Partners / Matrix Partners / NVentures	Capital and recognition section, database
Influencers, creators and educators	26 creator/educator rows	JustinGuitar / Marty Music / Rick Beato / Paul Davids	Trust infrastructure section, database
Media, publishers and cultural drivers	28 media/culture rows	Guitar World / MusicRadar / MusicTech / Billboard	Music-as-hobby and media/culture sections
AI companies and AI initiatives	9 database records / 4 key players	Suno / Music.AI-Moises / Udio / ElevenLabs	AI and rights layer, key players, timeline
Awards	12 award rows	Apple Design Awards / Google Play Best Of / The Webby Awards / The EdTech Awards	Capital and recognition section, database
Funding	12 funding rows	Business Finland R&D and piloting / Business Finland Co-Innovation / EIC Accelerator / Horizon Europe Cluster 2	Capital and recognition section, database
Last 24 months on the market	49 curated news-grade moves	Funding / M&A / AI launches / rights and policy / partnerships	Last-24-months market moves section

Last 24 months: curated market moves

The main table uses Grade A/B items only. Appendix-only rows are retained as context but should not carry the main narrative.

Date	Move Type	Player Or Signal	What Happened	Why It Matters For Yousician	Confidence	News Grade
2024-06-24	AI rights / litigation	Suno / Udio / RIAA	Major record companies filed copyright infringement cases against Suno and Udio.	AI music moved from novelty to rights, licensing and leadership-level risk.	High	A
2024-08-01	Policy / AI governance	European Union AI Act	The EU AI Act entered into force, with transparency rules for AI-generated content and GPAI obligations phasing in.	EU AI transparency and copyright compliance expectations matter for AI-enabled music learning and creation tools.	High	A
2024-09-24	Platform move	TikTok Music	TikTok announced it would shut down TikTok Music and focus on music discovery in the main TikTok app.	Music discovery power remains in social platforms even when full streaming products retreat.	Medium	B
2024-09-25	Hardware + software bundle	Duolingo / Loog	Duolingo Music was linked to a beginner-friendly portable piano product with Loog.	Consumer learning platforms are testing physical beginner bundles.	Medium	B
2024-10-01	Education / apps	ABRSM	ABRSM's 2024 impact report quantified global exams, qualifications and teacher support.	Formal assessment bodies still shape parent, teacher and serious-learner trust.	High	A
2024-11-12	AI product experiment	YouTube Dream Track	YouTube tested AI restyling of licensed songs for Shorts using Dream Track technology.	Short-form video platforms are turning licensed music into editable creator material.	Medium	B
2024-11-15	Marketplace closure	Microsoft TakeLessons	Microsoft's TakeLessons marketplace closed, with account access ending in November 2024.	Online lesson marketplaces remain fragile; teacher acquisition and continuity are strategic surfaces.	High	A
2025-01-15	Publishing / rights	Muse Group / Hal Leonard	Muse Group unified Hal Leonard US and Europe into a global publishing operation.	Song rights, notation, tabs and learning content are becoming more ecosystem-controlled.	Medium	B
2025-01-22	Funding / AI utility	Music.AI / Moises	Music.AI raised a \$40M Series A and reported Moises at 50M users.	AI practice utilities have meaningful reach and investor momentum.	High	A
2025-01-29	Policy / copyright	U.S. Copyright Office	The U.S. Copyright Office published Part 2 of its AI report on copyrightability of AI outputs.	Human-authorship rules affect generated content, practice tools and creator workflows.	High	A
2025-03-17	Education network signal	School of Rock	School of Rock social channels referenced roughly 400 global locations.	Offline music schools remain scaled trust and accountability channels.	Medium	B
2025-04-10	Artist platform	TikTok for Artists beta	Coverage indicated TikTok was preparing a dedicated artist insights platform before global launch.	TikTok is formalizing the data layer around music discovery.	Medium	B
2025-04-28	M&A / creator tools	Splice / Spitfire Audio	Splice announced the acquisition of Spitfire Audio.	Creator-tool platforms are consolidating premium sound libraries for AI-assisted creation.	High	A
2025-05-01	Education platform	Berklee Online	Berklee Online positioned itself as the world's largest online music school with 30,000+ learners from 140+ countries.	High-trust online music education offers a benchmark for credentialed, instructor-led learning.	High	A
2025-06-03	Artist insights	TikTok for Artists	TikTok for Artists launched globally after beta testing, initially in 26 countries.	TikTok is becoming structured music analytics and promotion infrastructure.	High	A
2025-08-01	AI music generation	ElevenLabs Music	ElevenLabs launched Eleven Music for prompt-based music generation.	Major voice/audio AI providers moved into full music creation.	High	A
2025-08-20	AI practice / creation	Moises AI Studio	Moises launched AI Studio for adaptive AI music creation support.	Practice utilities are expanding toward creation co-pilots.	High	A
2025-09-25	AI governance	Spotify	Spotify announced stronger AI protections for artists and songwriters.	Streaming-platform AI rules shape discovery, identity and rights expectations.	High	A
2025-09-30	Funding call	Creative Europe MEDIA	The 2026 Video Games and Immersive Content Development call opened.	Interactive learning, gamified practice or immersive music products may fit future EU creative funding routes.	High	A

Date	Move Type	Player Or Signal	What Happened	Why It Matters For Yousician	Confidence	News Grade
2025-10-02	Product launch	Splice INSTRUMENT	Splice moved beyond samples with a cloud-connected instrument plugin drawing on Spitfire libraries.	Creator platforms are reducing friction from inspiration to playable sound.	Medium	B
2025-10-22	Youth performance	School of Rock / Warped Tour	School of Rock locations announced student performers at Warped Tour Orlando.	Performance-based learning connects lessons with youth culture and live music moments.	Medium	B
2025-10-29	AI rights / licensing	UMG / Udio	UMG and Udio settled litigation and announced agreements for a licensed AI music creation platform planned for 2026.	A licensed AI music lane is emerging alongside litigation.	High	A
2025-11-19	Funding / AI music	Suno	Suno raised a \$250M Series C at a \$2.45B post-money valuation.	AI music generation has crossed into large-scale venture-backed consumer infrastructure.	High	A
2025-11-25	AI rights / partnership	Warner Music Group / Suno	Warner Music Group and Suno announced a partnership and settlement path for licensed AI models.	Major labels are beginning to define opt-in licensed AI models, not only legal opposition.	High	A
2025-12-03	Artist data	Spotify Wrapped for Artists	Spotify provided personalized Wrapped experiences for artists, songwriters, creators and advertisers.	Music platforms are expanding shareable analytics loops around identity and fandom.	High	A
2025-12-10	Cultural signal	TikTok Year in Music	TikTok named global 2025 music signals and highlighted Add to Music App behavior.	Short-form music demand increasingly predicts what users may want to sing, play or learn.	High	A
2025-12-14	Award / EdTech	WorldWiDE EdTech Awards	The 2026 WorldWiDE EdTech Awards nomination deadline closed.	Education awards provide low-cost credibility routes if evidence of learning impact is documented.	Medium	B
2026-01-07	Funding deadline	EIC Accelerator	The first 2026 EIC Accelerator full-application cut-off occurred.	Public deep-tech funding remains relevant for high-risk AI practice or learning innovations.	Medium	B
2026-01-22	Investor thesis	Menlo Ventures / Suno	Menlo framed Suno as participatory music creation in its Series C thesis.	Venture theses are shifting from music consumption to participatory creation.	High	A
2026-02-06	Award deadline	Webby Awards	The 30th Annual Webby Awards extended entry deadline closed.	Apps, software, immersive and creator categories are relevant for brand and product recognition.	High	A
2026-02-11	Funding deadline	Creative Europe MEDIA	The 2026 Video Games and Immersive Content Development call deadline closed.	Music-learning/game-like products need early planning for EU creative funding cycles.	Medium	B
2026-02-17	Funding result	EIC Accelerator	61 startups and SMEs secured EIC Accelerator support in the latest round.	EU deep-tech funding remains competitive but meaningful for high-risk innovation.	High	A
2026-03-01	Awards / education	EdTech Awards	The EdTech Awards 2026 announced finalists and winners in March 2026.	Learning-product credibility can be strengthened through education technology awards.	High	A
2026-03-15	Rights / royalties	Spotify Loud & Clear	Spotify's 2026 transparency reporting said 2025 payouts to the music industry exceeded \$11B.	Rights-holder economics affect catalog, artist relations and music-learning licensing context.	Medium	B
2026-04-02	AI awards	Tom's Guide AI Awards	Tom's Guide AI Awards nominations closed for 2026.	Consumer AI awards are useful external signals for AI utility positioning.	Medium	B
2026-04-15	AI creator tools	Splice	Splice announced generative AI tools tied to its creator compensation model.	Human-made licensed sample catalogs are being combined with traceable generative workflows.	Medium	B
2026-04-20	Award opening	Brandon Hall EdTech Awards	The Excellence in EdTech Awards launched for 2026 entries with a September deadline.	Operationally relevant award for learning products with measurable outcomes.	High	A
2026-04-30	Platform growth	YouTube Music / Premium	Alphabet reported record quarterly growth for YouTube Music and Premium non-trial subscribers.	YouTube remains central to hobby music discovery, lessons, creators and paid music consumption.	Medium	B
2026-05-01	Developer ecosystem	Google Play	Google Play summarized Q1 2026 discovery and developer tools updates.	App-store discovery and merchandising remain important for music-learning acquisition.	High	A
2026-05-18	Awards / iOS	Apple Design Awards	Apple announced 2026 Apple Design Award finalists.	Apple design recognition remains a benchmark for app craft, accessibility and interaction.	High	A
2026-05-22	Creator / hardware culture	Rick Beato / Gibson / Nuno Bettencourt	Guitar media highlighted Rick Beato's live collaboration at Six-String Sanctuary and use of signature Gibson gear.	Creator educators increasingly bridge learning, artist culture and hardware marketing.	Medium	B
2026-06-01	App accelerator	Google Play Apps Accelerator	Google Play announced the first Apps Accelerator class of 2026.	Platform accelerator programs are a route for app growth, merchandising and developer relationships.	High	A
2026-06-03	Funding / public RDI	Business Finland	Business Finland funding listings showed open R&D and internationalization funding routes.	As a Finnish company, Yousician can screen public RDI funding against product and AI initiatives.	High	A

Date	Move Type	Player Or Signal	What Happened	Why It Matters For Yousician	Confidence	News Grade
2026-06-03	Funding / AI music	Suno	Suno announced more than \$400M in Series D funding at a \$5.4B post-money valuation.	Strengthens Suno as the leading AI music-creation market signal and reinforces AI creation as a market-structure force, not only a feature trend.	High	A
2026-06-05	AI rights / labor	AFM / UMG / WMG	The American Federation of Musicians sued UMG and WMG over AI licensing to Suno and Udio.	AI-rights exposure now includes session musician compensation and labor claims.	Medium	B
2026-06-08	AI creation tooling	BandLab SongStarter	BandLab's help center updated SongStarter guidance for AI-generated song ideas.	Large creator communities are normalizing AI as a lightweight idea-generation layer.	High	A
2026-06-10	Award / iOS	Apple Design Awards	Apple revealed 2026 Design Award winners across app and game categories.	Awards can reveal current interaction and visual-quality benchmarks for consumer apps.	High	A
2026-06-10	Hardware + AI software	Fender Studio Pro / Moises	Fender Studio Pro update was reported to integrate Moises stem separation and a smart studio assistant.	Instrument brands are moving deeper into app, DAW and AI utility territory.	Medium	B
2026-06-10	AI rights / platform data	Google / YouTube / Lyria	Independent musicians sued Google over alleged use of YouTube-uploaded music for Lyria AI training.	Creator-platform data rights are becoming material to AI music tooling and trust.	Medium	B

Appfigures is an input note, not the market story

Appfigures remains the required source for app revenue, downloads, rank trends, review velocity and country mix. Those fields are prepared for import and are not estimated in this package.

16 app rows are ready for credentialed export/import; 0 credentialed rows are currently populated. Public app-store ratings or reviews are shown only as public proxies and must not be described as Appfigures.

The Appfigures data request is included separately. The main report therefore ranks by ecosystem influence, not app revenue/downloads.

The direct learning-app market remains visible even while performance is not finalized

This snapshot keeps the core music-learning app field visible without inventing Appfigures metrics. It is qualitative until credentialed revenue, download, rank and country-mix data is imported.

Player	What They Are	Audience Focus	Public Proxy Evidence	Why It Matters	Appfigures Status
Simply	Mobile-first music learning platform and direct reference point for casual learners.	Beginner / casual learners	Simply Guitar - Learn Guitar: 4.72 iOS public proxy, 383,142 iOS public proxy Google Play public proxy: 10M+ downloads, 4.6 rating, 360K reviews. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures. Simply Piano: 4.69 iOS public proxy, 824,845 iOS public proxy Needs Appfigures; include as Simply portfolio app. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	Useful benchmark for onboarding, motivation, pricing, and growth in app-based music education.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.
Flowkey	Piano learning app focused on songs, guided lessons, and practice support.	Beginner piano learners	flowkey - Learn to Play Piano: 4.72 iOS public proxy, 63,813 iOS public proxy Apple public proxy: 4.7 rating, 64K ratings; Google Play public proxy: 10M+ learners claim in listing. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	Important benchmark for piano learning, catalog positioning, and conversion mechanics.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.
Skoove	Digital piano learning platform for beginner and intermediate players.	Beginner piano learners	Skoove: Learn Piano: 4.58 iOS public proxy, 21,500 iOS public proxy Google Play public proxy: 1M+ downloads, 11.6K reviews. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	Relevant for piano pedagogy, app store positioning, and paid acquisition benchmarks.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.
Fender Play	Learning product connected to one of the strongest guitar brands.	Beginner guitar and bass learners	Fender Play: Learn Guitar: 4.80 iOS public proxy, 60,626 iOS public proxy Apple public proxy: 4.8 rating, 61K ratings; Google Play public proxy: 1M+ downloads, 13.2K reviews. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	Shows how instrument makers can extend into software, subscriptions, and beginner journeys.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.
Gibson App	Guitar-learning app connected to Gibson's hardware and brand ecosystem.	Beginner guitar learners and Gibson customers	Needs Appfigures and public app-store validation. Public proxy, not Appfigures.	Shows how a major guitar brand can bundle learning with instrument purchase and beginner motivation.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.
Guitar Tricks	Long-running online guitar lesson platform with structured courses, songs, and learning tools.	Guitar learners seeking structured lessons	No public app-store proxy attached in this package; use Appfigures or store validation before performance comparison.	Important guitar-specific subscription benchmark for curriculum depth, song-led learning, and adult beginner messaging.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.
Pickup Music	Modern guitar-learning platform built around structured pathways and contemporary player identity.	Intermediate and style-specific guitar learners	No public app-store proxy attached in this package; use Appfigures or store validation before performance comparison.	Useful benchmark for higher-intent guitarists, modern aesthetics, community, and guided weekly practice.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.
Rocksmith+	Interactive music-learning service built around real instruments, song catalog, and feedback.	Practice-oriented guitar/piano learners	Needs Appfigures plus Ubisoft platform data. Public proxy, not Appfigures.	Important benchmark for real-time feedback, licensed songs, game-like practice, and multi-instrument expansion.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.
Musora	Umbrella music education platform spanning drums, piano, guitar, singing, lessons, and community.	Multi-instrument learners	Needs Appfigures plus web membership validation. Public proxy, not Appfigures.	Adds an important multi-instrument subscription benchmark beyond single-instrument apps.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.
Fretello	Mobile guitar learning app focused on structured plans and guided practice.	Beginner and returning guitar learners	Needs Appfigures; specialist guitar-learning app. Public proxy, not Appfigures.	Directly relevant for guitar onboarding, lesson pacing, personalization, and app-store positioning.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.

Player	What They Are	Audience Focus	Public Proxy Evidence	Why It Matters	Appfigures Status
Duolingo Music	Consumer education app extension into music literacy	Mass-market beginner learners	No public app-store proxy attached in this package; use Appfigures or store validation before performance comparison.	Direct reference point for app-based music learning and beginner motivation.	Credentialed Appfigures data pending; no revenue/download/rank conclusions.

Teachers, creators, investors, media, awards and funding

Teachers / schools

17

Education bodies and teacher networks shape trust, progression, certification language and parent confidence.

Creators

26

Creator educators influence discovery, trust and beginner motivation. Platform reach remains partly pending.

Investors

22

Capital flows around music, education, creator tools and AI indicate adjacent market momentum.

Media / culture

28

Media, platforms and cultural drivers explain demand formation before app consideration.

Awards

12

Award entries are now usable as an operational tracker with fit, timing and effort fields.

Funding

12

Funding opportunities are separated from investors and marked by geography, eligibility and effort.

Six priority actors in a closer brief-style one-pager format

These profile pages mirror the field logic from the brief example: what they are, why they matter, business snapshot, product surface, AI initiatives, last 24 months, ecosystem position, relationship field, strategic assessment and sources. The full 28-player set remains in the workbook.

KP-01 / MUSIC LEARNING APPS AND PLATFORMS

Medium

WHAT THEY ARE

Mobile-first music learning platform and direct reference point for casual learners.

BUSINESS SNAPSHOT

Publicly visible consumer app; precise reach requires Appfigures or traffic validation.
Simply Guitar - Learn Guitar: 4.72 iOS public proxy, 383,142 iOS public proxy | Google Play public proxy: 10M+ downloads, 4.6 rating, 360K reviews. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures. | Simply Piano: 4.69 iOS public proxy, 824,845 iOS public proxy | Needs Appfigures; include as Simply portfolio app. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.

AI INITIATIVES

AI/personalization relevance should be validated before being treated as a product claim.

ECOSYSTEM POSITION

Music learning apps and platforms

STRATEGIC ASSESSMENT

Credentialed Appfigures data is pending. Do not use this row for revenue, downloads, rank trend, review velocity, country mix or app-performance ranking.

WHY THEY MATTER

Useful benchmark for onboarding, motivation, pricing, and growth in app-based music education.

PRODUCT PORTFOLIO / SURFACE

Direct learning app

All 28 key players in the fields requested by the brief

The full table keeps every priority actor visible without forcing all 28 into dense mini-cards. It follows the requested fields and adds a success-basis column so “successful” does not collapse into one unpopulated app-performance metric.

Player	Category	Success Basis	What They Are	Size Reach	Ownership Investors	AI Recent Initiative	Why They Matter
Simply	Music learning apps and platforms	Direct app / beginner learning	Mobile-first music learning platform and direct reference point for casual learners.	Publicly visible consumer app; precise reach requires Appfigures or traffic validation. Public proxy: Simply Guitar - Learn Guitar: 4.72 iOS public proxy, 383,142 iOS public proxy Google Play public proxy: 10M+ downloads, 4.6 rating, 360K reviews. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures. Simply Piano: 4.69 iOS public proxy, 824,845 iOS public proxy Needs Appfigures; include as Simply portfolio app. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	Simply Ltd / Simply app developer listing	AI/personalization relevance should be validated before being treated as a product claim.	Useful benchmark for onboarding, motivation, pricing, and growth in app-based music education.
Ultimate Guitar	Music hobby software ecosystem	Repertoire and song-practice surface	Tab, chord, song, and musician community ecosystem for guitar players.	Large global music community Public proxy: Ultimate Guitar: Chords & Tabs: 4.74 iOS public proxy, 459,471 iOS public proxy Google Play public proxy: 10M+ downloads, 627K reviews. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	Muse Group	Research AI-assisted discovery, practice, and content workflow signals	Strong influence on how hobbyists discover songs and move from inspiration to practice.
Fender Play	Music learning apps and platforms	Direct app / beginner learning	Learning product connected to one of the strongest guitar brands.	Brand-backed learning app Public proxy: Fender Play: Learn Guitar: 4.80 iOS public proxy, 60,626 iOS public proxy Apple public proxy: 4.8 rating, 61K ratings; Google Play public proxy: 1M+ downloads, 13.2K reviews. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	Fender	Confirmed app feedback surface; broader AI/connected-instrument roadmap remains a monitoring hypothesis	Shows how instrument makers can extend into software, subscriptions, and beginner journeys.
Flowkey	Music learning apps and platforms	Direct app / beginner learning	Piano learning app focused on songs, guided lessons, and practice support.	Established piano app Public proxy: flowkey - Learn to Play Piano: 4.72 iOS public proxy, 63,813 iOS public proxy Apple public proxy: 4.7 rating, 64K ratings; Google Play public proxy: 10M+ learners claim in listing. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	flowkey GmbH; Yamaha partnership should be treated as partner context unless ownership is separately validated	Confirmed feedback/product-learning surface; AI content generation remains a monitoring hypothesis	Important benchmark for piano learning, catalog positioning, and conversion mechanics.
JustinGuitar	Music hobby software ecosystem	Ecosystem influence	Influential guitar educator with a broad online learning footprint.	Large creator-led audience	JustinGuitar official learning site / creator-led educator platform; no ownership/investor claim used beyond public product identity.	Research how creator-led learning uses AI-assisted practice or content	Shows the power of trusted teachers and free content in shaping learner behavior.
Fender	Instrument brands, manufacturers and distributors	Hardware funnel / brand reach	Iconic guitar brand with reach across aspiration, hardware, education, and artist culture.	Major global brand	Fender Musical Instruments Corporation / official company and product source; private ownership history not used as a main narrative claim.	Research connected instrument and practice feedback initiatives	Instrument brands can shape the beginner funnel before users choose a learning app.
Yamaha	Instrument brands, manufacturers and distributors	Hardware funnel / brand reach	Large music instrument and audio company with broad education relevance.	Major global brand	Public company / Yamaha Corporation	Research smart instruments, learning integrations, and audio AI	Influences hardware access, music education channels, and partner possibilities.
BandLab	Music hobby software ecosystem	Hobby creation / community	Cloud music creation and collaboration ecosystem with strong creator and community signals.	Large creator community Public proxy: BandLab Music Maker & Beats: 4.75 iOS public proxy, 484,499 iOS public proxy Apple public proxy: 4.8 rating, 484K ratings; company proxy: 100M+ creators and fans. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	BandLab Technologies / part of Caldecott Music Group; BandLab is the group flagship social music platform.	AI-assisted creation and creator-workflow relevance should be validated before high-stakes use.	Represents the shift from learning an instrument to making and sharing music quickly.
Splice	Music hobby software ecosystem	Hobby creation / community	Sample, sound, and creator workflow platform.	Large creator tool	Splice official music creation platform; private ownership/investor history not used as a main narrative claim.	AI search/generation/workflow relevance should be validated before high-stakes use.	Shows how hobbyists and creators pay for tools that accelerate making music.

Player	Category	Success Basis	What They Are	Size Reach	Ownership Investors	AI Recent Initiative	Why They Matter
Suno	AI companies and AI initiatives	AI creation and market-structure signal	AI music generation platform that changes how non-musicians create complete songs.	High visibility AI platform	Suno official Series D source: over \$400M raised at a \$5.4B post-money valuation, led by Bond Capital with named investors.	Core AI music generation	May shift the meaning of music participation, motivation, and creation for casual users.
Udio	AI companies and AI initiatives	AI creation and market-structure signal	AI music generation platform for prompt-based song creation.	High visibility AI platform	Udio official/UMG source: AI music company backed by a16z, Redpoint, Hanwha, will.i.am, Steve Stoute, Kevin Wall and others.	Core AI music generation	Important to understand whether AI creation competes with, complements, or expands music learning.
Moises	AI companies and AI initiatives	AI practice utility	AI-powered music practice and audio utility used by musicians and learners.	Large musician utility Public proxy: Moises: The Musician's App: 4.70 iOS public proxy, 26,579 iOS public proxy Apple public proxy: 4.7 rating, 27K ratings; company / MBW proxy: Music.AI says Moises reached 50M users. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	Private	Audio separation, practice tools, smart music utilities	Strong example of AI improving practice workflows without replacing instrument learning.
Duolingo	Teachers, schools and music education organizations / wider education	Ecosystem influence	Consumer learning benchmark for habit formation, gamification, and subscription education.	Very large public consumer education app	Public company / Duolingo, Inc.	AI personalization and tutoring relevance should be validated before high-stakes use.	Not music-specific, but highly relevant for learning loops, retention, brand, and AI in education.
Guitar Tricks	Music learning apps and platforms	Ecosystem influence	Long-running online guitar lesson platform with structured courses, songs, and learning tools.	Large online guitar education platform	Guitar Tricks Inc.	Research personalization, practice planning, and lesson recommendation signals	Important guitar-specific subscription benchmark for curriculum depth, song-led learning, and adult beginner messaging.
Pickup Music	Music learning apps and platforms	Ecosystem influence	Modern guitar-learning platform built around structured pathways and contemporary player identity.	Growing modern guitar platform	Pickup Music, Inc.	Research personalized feedback, pathway design, and practice accountability	Useful benchmark for higher-intent guitarists, modern aesthetics, community, and guided weekly practice.
Rocksmith+	Music learning apps and platforms	Direct app / beginner learning	Interactive music-learning service built around real instruments, song catalog, and feedback.	Major game-backed learning brand Public proxy: Needs Appfigures plus Ubisoft platform data. Public proxy, not Appfigures.	Ubisoft	Research note detection, adaptive difficulty, and song-based feedback mechanics	Important benchmark for real-time feedback, licensed songs, game-like practice, and multi-instrument expansion.
Gibson App	Music learning apps and platforms	Direct app / beginner learning	Guitar-learning app connected to Gibson's hardware and brand ecosystem.	Brand-backed learning app Public proxy: Needs Appfigures and public app-store validation. Public proxy, not Appfigures.	Gibson App is visibly linked from Gibson official media/discover navigation and has its own official product site.	Research real-time feedback and brand-led personalization	Shows how a major guitar brand can bundle learning with instrument purchase and beginner motivation.
Chordify	Music hobby software ecosystem	Repertoire and song-practice surface	Chord-recognition and play-along platform that turns songs into playable chord progressions.	Large chord utility Public proxy: Needs Appfigures / public app-store validation. Public proxy, not Appfigures.	Chordify official product/company identity; full ownership/investor history not used as a main narrative claim.	Chord recognition, song parsing, and practice support	Owns a high-intent moment between song discovery and self-guided practice.
YouTube	Music hobby software ecosystem	Ecosystem influence	Default open platform for free music learning, creator-led lessons, discovery, and artist careers.	Massive global platform	YouTube for Artists official product surface; Google/Alphabet public-company context validated through Alphabet investor/SEC materials.	Recommendation, Shorts discovery, creator tools, and AI content policy	A major substitute and funnel for self-guided learning; it shapes inspiration, discovery, and expectations of free content.
Gibson	Instrument brands, manufacturers and distributors	Hardware funnel / brand reach	Iconic guitar brand with a direct learning app and hardware-led beginner entry points.	Major guitar brand	Private	Research connected learning, app feedback, and brand-led beginner journeys	Hardware brands can capture learner intent before software choice and can bundle education into purchase moments.
Positive Grid	Instrument brands, manufacturers and distributors	Hardware funnel / brand reach	Smart guitar amp and app ecosystem connecting gear, tones, songs, and practice.	Visible smart-amp ecosystem	Positive Grid Limited / official product company source.	AI tone generation, chord detection, smart practice, and connected hardware	Shows how hardware can become an app-led practice surface and compete for daily guitar time.
FL Studio	Music hobby software ecosystem	AI creation and market-structure signal	Popular music production software known for fast beat-making and accessible creator workflows.	Major producer platform	Image-Line	Research browser DAW, AI-assisted production, and beginner creator onboarding	Shapes the path from musical interest to beat-making, production, and creator identity.

Player	Category	Success Basis	What They Are	Size Reach	Ownership Investors	AI Recent Initiative	Why They Matter
ElevenLabs Music	AI companies and AI initiatives	AI creation and market-structure signal	AI audio platform expanding into full music generation from natural language prompts.	High-profile AI audio company	ElevenLabs official company/product source includes AI music and creative-audio capabilities; private funding history requires separate validation.	Core AI music and audio generation	Important because major AI audio platforms may enter music creation, rights, and creator tooling at scale.
Spotify for Artists	Investors, media, awards, funding and cultural drivers	Capital / recognition signal	Artist-facing platform for managing Spotify presence, audience insights, promotion, and artist business tools.	Major global music platform	Spotify for Artists official product surface under Spotify.	Artist authenticity, AI music policy, recommendations, and creator tools	Important for how hobbyists understand music success, release goals, artist identity, and AI-authenticity debates.
TikTok for Artists	Investors, media, awards, funding and cultural drivers	Capital / recognition signal	Artist insight platform tied to TikTok's music discovery and fan engagement surface.	Massive short-form discovery platform	ByteDance	Recommendation, trend detection, creator tools, and AI content policy	TikTok can shape song discovery, cultural momentum, and what learners want to play.
Musora	Music learning apps and platforms	Direct app / beginner learning	Umbrella music education platform spanning drums, piano, guitar, singing, lessons, and community.	Large online music lesson ecosystem Public proxy: Needs Appfigures plus web membership validation. Public proxy, not Appfigures.	Private	Research practice feedback, lesson recommendation, and cross-instrument learning paths	Adds an important multi-instrument subscription benchmark beyond single-instrument apps.
Fretello	Music learning apps and platforms	Direct app / beginner learning	Mobile guitar learning app focused on structured plans and guided practice.	Specialist guitar app Public proxy: Needs Appfigures; specialist guitar-learning app. Public proxy, not Appfigures.	Fretello official specialist guitar-learning app; company/operator details require registry or app-store validation for legal precision.	Research personalization, adaptive plans, and feedback patterns	Directly relevant for guitar onboarding, lesson pacing, personalization, and app-store positioning.
Chord ai	Music hobby software ecosystem	AI practice utility	Mobile app that detects chords and song structure from audio to support self-guided playing.	Visible AI practice utility Public proxy: Chord ai: 4.65 iOS public proxy, 5,856 iOS public proxy Needs Appfigures; public listings validate AI chord recognition. Public proxy, not Appfigures. iTunes Lookup refreshed 2026-06-11; public proxy only, not Appfigures.	Chord ai official AI chord-recognition product; developer/legal entity should be validated from app-store or company records before precise ownership wording.	Core AI chord recognition and song parsing	Important because it moves AI directly into the song-to-practice moment that GuitarTuna/Yousician users care about.

Open data fields before broader external use

Appendix

Appfigures

Open until credentialed export/API data is imported. No app-performance ranking should be finalized.

Source-linked statements

157 statement rows retain source confidence for broader use.

Relationships

Internal relationship status not yet captured in this dataset. To be completed by Yousician.

Source review

25 source-change items and 78 access rows remain open in the appendix.

Check Id	Label	Status	Count	Detail	Next Action
key_players	All 28 key players present	passed	28	28 key-player rows are present.	Keep at 28 unless the key-player scope changes.
market_moves	Main timeline depth	passed	49	49 curated market moves are marked for main timeline use.	Keep weaker context items in appendix-only status.
appfigures	Credentialed Appfigures status	pending	0	0 of 16 app rows are credentialed Appfigures imports.	Import Appfigures export/API output before app revenue/download/rank conclusions.
appfigures_request	Appfigures data request	passed	16	16 app rows are ready for credentialed export.	Use the data request as the source list for Appfigures export.
relationships	Relationship input field	pending	28	28 of 28 relationship rows still need Yousician owner input.	Do not infer relationships externally; assign internal owners.
review_queue	Open source-change review queue	passed	0	0 source-change/new-source rows remain open after excluding refresh retry/access rows.	Review or reject source changes before leadership use.
refresh_retries	Refresh retry/access rows	warning	78	78 open rows are local refresh retry/access checks, not accepted market claims.	Retry when network/source access is available or replace inaccessible sources.
review_duplicates	Duplicate open refresh rows	passed	0	0 sources have repeated open refresh rows.	Safe fix marks older duplicate rows as superseded and keeps the latest row open.
proxy_note_duplicates	Repeated public proxy notes	passed	0	0 Appfigures proxy rows contain repeated note text.	Safe fix de-duplicates repeated note sentences without changing metrics.
source_context	Source-linked statement confidence	warning	33	33 source-linked statements still have Low/Pending source confidence.	Validate ownership, funding, user counts, AI and M&A statements before broader external use.
source_confidence	Source audit confidence	warning	42	42 source-audit rows are Low/Pending.	Upgrade only with stronger source review; do not auto-promote.

Source context and remaining open data fields

Appendix

Source context mix: {'Pending': 12, 'Low': 20, 'High': 76, 'Medium': 98}. The full source appendix remains in the database and CSV appendix.

Gap	Status	Detail	Priority	Next Action	Owner Placeholder
Appfigures metrics	Pending / credentialed export required	Revenue, downloads, ranks, ratings velocity, country mix and 12-month trends remain pending unless populated from a credentialed Appfigures export.	Critical	Export the Appfigures data request and import the credentialed Appfigures export.	Yousician / Appfigures credential owner
Internal relationship status	Pending / internal owner input required	Internal relationship ownership, history and sensitivity fields are prepared for Yousician input and must be filled only from confirmed internal knowledge.	Critical	Assigned Yousician owners fill relationship owner, status, sensitivity and last-contact fields.	Yousician owners
Private company ownership and revenue	Mostly source-skimmed / paid database still required for deeper investor history and revenue	Public source skim now validates the remaining visible product/company identity and several parent-company or investor-context fields. Deep private-company ownership, investor history and revenue still require Crunchbase, PitchBook, Dealroom, registry or direct validation.	Medium	Use paid-database or direct company validation only if the next read needs detailed private ownership, investor history or revenue estimates.	Research owner TBD
Influencer multi-platform reach	Partially complete / YouTube source skim improved; platform exports still required	YouTube public-profile/source proxies were refreshed for the previously open creator-reach rows. TikTok, Instagram and average views remain marked as pending platform export for campaign planning.	Medium	Use YouTube/TikTok/Instagram channel exports or creator tools to fill exact current reach and average-view fields before campaign use.	Creator/partnership owner TBD
Traffic and SEO	Pending / Similarweb or analytics-grade export required	Web traffic for song/practice ecosystems, teacher platforms and media drivers requires Similarweb or a comparable analytics export.	Medium	Run Similarweb export for priority domains and label it as public/third-party traffic estimate.	Research owner TBD
Awards and funding deadlines	Operationalized / quarterly refresh needed	Awards and funding rows now contain deadlines, effort, fit and immediate next steps; date cycles should still be refreshed quarterly.	Low	Review deadlines at the start of each quarter and assign an ops/comms owner before submission decisions.	Ops / comms owner TBD
User research linkage	Pending / Confluence research-database access required	Market signals should be linked back to Yousician user research before turning observations into recommendations. This pass does not have Confluence research database access.	Medium	Search the Yousician User Research Database for guitar beginner motivation, FTUX, churn, pricing and competitor studies and add study links to the report appendix.	Research / strategy owner TBD

Source-linked observation sample

Entity	Statement Type	Statement	Source Confidence	Main Narrative Rule
Moises	Ownership / investors	Private	Medium	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Pickup Music	Ownership / investors	Pickup Music, Inc.	Medium	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Suno / Udio / RIAA	Market move	2024-06-24: Major record companies filed copyright infringement cases against Suno and Udio.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
European Union AI Act	Market move	2024-08-01: The EU AI Act entered into force, with transparency rules for AI-generated content and GPAI obligations phasing in.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
TikTok Music	Market move	2024-09-24: TikTok announced it would shut down TikTok Music and focus on music discovery in the main TikTok app.	Medium	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Duolingo / Loog	Market move	2024-09-25: Duolingo Music was linked to a beginner-friendly portable piano product with Loog.	Medium	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
YouTube Dream Track	Market move	2024-11-12: YouTube tested AI restyling of licensed songs for Shorts using Dream Track technology.	Medium	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Microsoft TakeLessons	Market move	2024-11-15: Microsoft's TakeLessons marketplace closed, with account access ending in November 2024.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Music.AI / Moises	Market move	2025-01-22: Music.AI raised a \$40M Series A and reported Moises at 50M users.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
U.S. Copyright Office	Market move	2025-01-29: The U.S. Copyright Office published Part 2 of its AI report on copyrightability of AI outputs.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.

Entity	Statement Type	Statement	Source Confidence	Main Narrative Rule
School of Rock	Market move	2025-03-17: School of Rock social channels referenced roughly 400 global locations.	Medium	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Splice / Spitfire Audio	Market move	2025-04-28: Splice announced the acquisition of Spitfire Audio.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
TikTok for Artists	Market move	2025-06-03: TikTok for Artists launched globally after beta testing, initially in 26 countries.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
ElevenLabs Music	Market move	2025-08-01: ElevenLabs launched Eleven Music for prompt-based music generation.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Moises AI Studio	Market move	2025-08-20: Moises launched AI Studio for adaptive AI music creation support.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Spotify	Market move	2025-09-25: Spotify announced stronger AI protections for artists and songwriters.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Creative Europe MEDIA	Market move	2025-09-30: The 2026 Video Games and Immersive Content Development call opened.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Splice INSTRUMENT	Market move	2025-10-02: Splice moved beyond samples with a cloud-connected instrument plugin drawing on Spitfire libraries.	Medium	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
UMG / Udio	Market move	2025-10-29: UMG and Udio settled litigation and announced agreements for a licensed AI music creation platform planned for 2026.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Suno	Market move	2025-11-19: Suno raised a \$250M Series C at a \$2.45B post-money valuation.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Warner Music Group / Suno	Market move	2025-11-25: Warner Music Group and Suno announced a partnership and settlement path for licensed AI models.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Spotify Wrapped for Artists	Market move	2025-12-03: Spotify provided personalized Wrapped experiences for artists, songwriters, creators and advertisers.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
TikTok Year in Music	Market move	2025-12-10: TikTok named global 2025 music signals and highlighted Add to Music App behavior.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
WorldWiDE EdTech Awards	Market move	2025-12-14: The 2026 WorldWiDE EdTech Awards nomination deadline closed.	Medium	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
EIC Accelerator	Market move	2026-01-07: The first 2026 EIC Accelerator full-application cut-off occurred.	Medium	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Webby Awards	Market move	2026-02-06: The 30th Annual Webby Awards extended entry deadline closed.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
Creative Europe MEDIA	Market move	2026-02-11: The 2026 Video Games and Immersive Content Development call deadline closed.	Medium	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
EdTech Awards	Market move	2026-03-01: The EdTech Awards 2026 announced finalists and winners in March 2026.	High	May be used in the main narrative with source URL and confidence visible; final source skim recommended before external leadership/investor use.
